

Name: _____ Date: _____ Group: A / B Coding group: 1 / 2 / 3 / 4

Review the video and answer the following questions.

Write at least three things you notice about the video BEFORE pressing play:

- 1)
- 2)
- 3)

Pause the video at different times BEFORE the animals reach the end. Write at least three things that you notice.

- 1)
- 2)
- 3)

Pause the video at the very END. Write at least three things that you notice.

- 1)
- 2)
- 3)

Pause the video at 2 hours, then fill in this table.

Animal	Time	Distance

Review the video and answer the following questions.

1. Review the speeds for all of the animals. Then answer the following:

Which one has the highest speed? How do you know?

Which one has the lowest speed? How do you know?

2. Which animal covered the distance faster than everyone else?

3. Which animal covered the distance slower than everyone else?

4. How do you use the speeds to determine who comes first, second, third, fourth

#1 Assignment: understanding rates

a. A police car drives 236 km in 3 hours.
What is its average speed in kilometers per hour?

b. Mike drives his car 60 km in 55 minutes.
What is its average speed in kilometers per minute?

#2 Assignment: Compute distances from rates

c. Sarah rides her bike with a constant speed of 9 km/h.
How far can she travel in 4 hours?

d. An airplane flies with a constant speed of 398 mph.
How far can it travel in 3 and $\frac{1}{2}$ hours?

#3 Assignment: Compute times from rates

e. A train travels with a constant speed of 34 km/h. How long will it take to travel a distance of 33.4 kilometers?	f. An airplane flies with a constant speed of 880 km/h. How long will it take to travel a distance of 3652 kilometers?
--	---

#4 Bonus: Decide which section should be used to solve these problems:

g. Find speed when, distance is 142 km and time is 2 hours.	h. Find out the distance covered when, speed is 960 km/hour and time is 5.5 hours.
---	--
